

Summer Nature Mobile

You need:

a shallow tray or bowl that can go in the freezer

a piece of string or twine

Materials you found in nature, flowers, leaves, seedpods, feathers...

Water

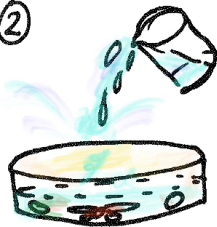

①

arrange flowers and natural materials in the bottom of the tray

②

fill tray with 1 or 2 cm deep of water.

③

place string in tray like a handle with a loop hanging out.

④

place in the freezer and leave overnight.

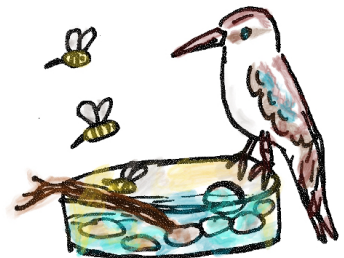

⑤

Take out of tray and hang in garden!

How long will it take to melt? You can play and feel the cool, can you make a water + ice kitchen?

Don't forget to use the tray to leave some water out for wildlife in the heat, add some rocks and sticks so the bees can all land.
